DETAILED ACTION

1. Applicant's amendment and accompanying remarks filed August 8, 2006 are acknowledged.
2. Examiner acknowledges amended claims 1 and 13-14.
3. Examiner acknowledges cancelled claims 7 and 9-10.
4. The rejection of claims 1-6, 8 and 11-14 under 35 U.S.C. 112, second paragraph is overcome by applicant's amendment.
5. The rejection of claims 1-6, 8 and 11-14 under 35 U.S.C. 103(a) as being unpatentable over Yorgason, U.S. Patent Number 5,280,706 in view of Thompson et al., U.S. Patent Number 6,679,965 is overcome by applicant's amendment.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re*

Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-3 and 13 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 3-5 and of U.S. Patent No. 6,679,965. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the present claims and the patented reference recite a composite article comprising a pre-preg material having a specific density ranging from approximately 1.00 g/ml to approximately 1.15 g/ml and comprising a thermosetting resin such as a phenolic resin. Additionally, both the present claims and the patented reference recite that the composite article is used a rocket nozzle component. The patented reference discloses that the pre-preg comprises a silica cloth material (reinforcement). The patented reference discloses the process for forming the composite article with the same components of the present claims. Therefore, it would have been obvious to one of ordinary skill in the art that the composite article formed in the patented reference is the same composite article of the present claims.

Art Unit: 1774

8. Claims 4-6, 8, 11-12 and 14 would be allowable upon submission of the terminal disclaimer.

Response to Arguments

9. Applicant's arguments with respect to the instant claims have been considered but are moot in view of the new ground(s) of rejection.
